

Estey  
Reed Organs

# ESTEY QUALITY

## Material

Every article that enters into the construction of an ESTEY ORGAN is of the best quality that money can buy. Every bit of wood is thoroughly seasoned, being air dried for months and in some cases years, and then kiln dried.

Every article of furnishing, from the beveled French plate mirror to the carpet on the pedals, is **number one** quality.

## Workmanship

ESTEY ORGANS are **made**, not thrown together. They are made by intelligent workmen, not boys.

## Warranted

We warrant our instruments against defects in material or workmanship, and we "make good" that warranty.

## Reputation

Our business is to make **good** Organs, and if that kind appeals to you, buy an ESTEY.

## 60 Years

For more than sixty years the standard by which organs are judged—If it's "as good as an ESTEY," better get an ESTEY.

## Total Cost

First Cost is Total Cost if you buy an ESTEY. Don't lose sight of that fact.

There is a satisfaction in owning a first-class instrument.

## Price

Our prices are based on our costs, not on prices made by other manufacturers.

A good Organ should last a lifetime—an ESTEY will.

It is the constant aim of this company to supply organs of such design as to suit as nearly as may be all classes of purchasers.

The organ shown above is preëminently artistic in design, is richly decorated and entirely unique.

The organ itself is wonderfully rich and attractive and full of merit. Furnished in five and six octaves compass.

**Thomas R. Patterson, Hayfield, Man.**

"I write to say that I have received the Estey Organ, Style 671. It arrived here all safe and sound in every way, and I must say it is a very fine instrument and we are well satisfied with it."

### Style 79

One can readily appreciate that with the large number of case designs and the different actions, or interiors, it is no easy matter to keep this large variety in stock. We are obliged, however, to cater to the demands of many different countries, and while we show above three different interiors, please bear in mind wherever reference to this page is made for description of interiors, that we can also furnish anything from a combination as small as one and three-fifths sets to one containing five and one-fifth sets.

The descriptions above are the most popular, and ones that we can furnish instantly.

Naturally, the smaller cases will not take larger interiors than specified. Case designs FF, S and C will take actions containing as many as five and one-fifth sets.

Length (5 octaves), 3 feet 10 inches, (6 octaves), 4 feet 3 inches. Height, 6 feet 8 inches. Depth, 1 foot 11 inches.  
Weight (boxed), 410 pounds.

Always specify whether Black Walnut or Quartered Oak Case is preferred

*Mrs. F. E. Long, Public School, Alfredtown, New South Wales.*

"Some four or five years ago I purchased an Estey Organ from your firm and I must say I could not have got a better instrument for the climate. The object of my writing is to inform you of the severe test it was put to during the recent disastrous fires. We live in a brick residence surrounded by heavily timbered country. On January 1, we were hemmed in by fires on all sides within a few yards of the door. Just picture to yourself a sea of burning timber miles wide and the heat so intense that the very floors would burn you, and the furniture hot to the touch. Our organ stood the ordeal, not a note out, and nothing any different from when I bought it. No tuner has touched it since I bought it, nothing has been done to it, which speaks volumes for the quality of an Estey. I am very proud to possess such an instrument and my husband would like me to purchase a piano from you later on."

Height, 6 feet 8 inches. Depth, 1 foot 11 inches. Length, 3 feet 10 inches. Weight (boxed), 390 pounds.

Fathomless (Walnut)  
Fathlings (Mahogany)

In appearance these organs are the closest possible approach to a piano and every detail in design and construction has been carefully considered.

In tone, they are all that can be desired, while in design, material and all that goes to make up a superior organ, they are not excelled.

The name *Estey* is surely an all-sufficient guarantee.

Height, 4 feet 7 inches. Length, 5 feet. Depth, 2 feet 2 inches. Weight (boxed), 445 pounds.

**Style W 74** Contains two full sets of Reeds with Divided Couplers as follows: One complete set of eight feet reeds, seven and one-third octaves compass; one set of eight feet Reeds, four and two-thirds octaves compass, Treble, and one set of four feet Reeds, two and two-thirds octaves compass, Bass, with Divided Couplers.

CODE { Historical (Walnut)  
{ Hindered (Oak)  
{ Highflown (Mahogany)

Most attractive design Piano-Case Organ ever shown. Nothing in any catalog approaches it.

Will sell itself if it has a fair chance. The absence of Knee Swells makes a notable improvement in its appearance. The fundamental Reeds—Diapason and Melodia—are in "open register," as they are always wanted. The Vox Jubilante and Viola Reeds are controlled by metal stop knobs at each end of the keyboard as are also the additional Bourdon Reeds in the style W 75. The Couplers are operated by the middle pedal. The full scale keyboard enables the performer to render piano music with ease. The repetition or response to the touch of the player is instantaneous, as in all Estey Organs.

**H. W. Phillips, Richmond, N. Y.**

"The organ (piano case) you shipped me, after a two weeks' trial proves to be a real instrument. The tone is beautiful, the action is easy and the mechanical arrangements are perfect. As a piece of designing, the case is simple and fine. I really feel much indebted to you for the chance of obtaining something that I had looked for for several years unsuccessfully."

The organs described in the preceding pages are designed primarily for the home.

Organs for churches, chapels, halls, lodge rooms, and schools are described in the following pages. No other manufacturer of Reed Organs offers so large a variety of desirable styles for these purposes. The great range in prices makes it possible for the humblest organization to purchase, and affords to the larger institutions organs of satisfactory compass and size. Organs for special purposes which appeal to a limited constituency only; organs specially designed for students' practice, having two manuals and pedals; portable organs, folding easily for traveling purposes on land or water; special organs for artists' use with beautiful solo effects; and elaborate combinations are described in the following pages.

Philharmonic. Where this word appears (opposite the larger cases), it is an indication that in the case so specified we use the Philharmonic Reeds. Philharmonic in the Estey factory means the use of larger and more powerful reeds, thereby giving greater volume of tone. This is distinctly an ESTEY feature and not to be found in other organs. ESTEY Reeds are made in our own factory and are the envy of all other Reed Organ Manufacturers.

## THE LATEST FOLDING ORGAN Style JJ (Portable)

CODE—Folding

### *Strong, Durable, Easily Opened and Closed*

Four octaves compass, well voiced, ample wind power. Easily transported and always adequate.

When open, the keyboard is 30 inches from the floor, and the case stands 32 inches high. When closed or collapsed, the case measures 32 inches long, 14 inches wide and 12 inches high. Weight, 60 pounds; boxed, 90 pounds.

Provided with strong leather handles for safe and easy moving.

A treasure for missionaries or traveling singers.

Furnished in oak only.

## KINDERGARTEN ORGAN

### Style 3

CODE—Falcon

Length, 32½ inches. Height, 32 inches. Width, 12 inches. Weight (boxed, knocked down), 90 pounds.

*Plain, Substantial, Serviceable,  
Satisfactory*

Contains one four octave set of Reeds, specially adapted to small school and class work.

## FOLDING ORGAN

### Style 2

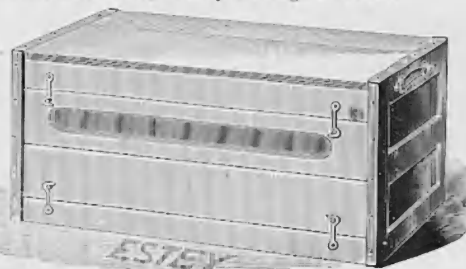

CODE—Fabled

Organ contains two full four octave sets of Reeds and Octave Coupler. Height, open, 2 feet 9 inches; Height, closed, 1 foot 2 inches; Length, 2 feet 9 inches; Depth, 1 foot 9 inches; Weight, 70 pounds (boxed, 135 pounds); Measurements, 9 cubic feet.

This Folding Organ has proven its value and made for itself thousands of friends during the years it has been on the market.

The case is made of oak, and is especially strong and well adapted for traveling purposes. It can be readily opened or closed by one person and is secured firmly with very strong brass hooks and screws.

For ordinary traveling no packing case whatever is required.

Great care is exercised in the manufacture of these organs throughout, waterproof glue, brass screws, coated wire, etc., being used to avoid the disastrous effects of tropical climates on wood and metal alike. Hundreds have been sold and are giving splendid satisfaction and their record is certainly phenomenal.

Organs described on this page are made only in Oak

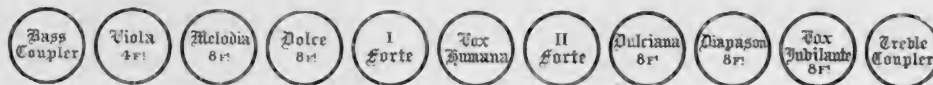

Height, 3 feet 10½ inches. Length, 3 feet 8 inches. Depth, 1 foot 8 inches. Weight (boxed), 315 pounds.

**Style 6** Rail Top. Furnished in Oak or Walnut Finish. CODE } Floral (Walnut Finish)  
 } Flood (Oak)

### CONTENTS

ELEVEN STOPS, as follows:

Always specify whether Oak or Walnut Case is wanted

*Emily C. Wheeler, Secretary's Office, National Armenian Relief Committee and Orphan Homes in India, Worcester, Mass.*

"My experience as a missionary in Turkey leads me to say that our Estey Organs which were in use in various departments of Euphrates College were the ones that gave us the least trouble, remaining longer in tune, under the hard usage they received, than any others we had. In sending out organs to the College and other schools in Turkey and also to orphanages, I have preferred to buy the Estey Organ because I felt that its construction was such that it would endure hard usage and climatic influences better than any other organ with which I was acquainted."

Length, 3 feet 10 inches. Height, 4 feet 4 inches. Depth, 1 foot 11 inches. Weight (boxed), 330 pounds.

These organs are furnished with the ESTEY PHILHARMONIC REEDS, which are without a peer in their musical and "carrying" qualities. The Gothic design of case is especially in keeping with most church interiors, and the organ in its entirety is a marvel of completeness.

*Rev. Colwell Townsend, Pastor Baptist Church, Bradford, N. Y.*

"The organ, Style H 97, came to hand a little more than a week ago, and it is a beauty. The tone is unsurpassed by any other instrument of its class I ever saw. Our people wish to tender their thanks for the interest you have shown in the church. We shall always speak well of the Estey."

The above organ, in its design and specification, or contents, is the very embodiment of good taste and refinement.

It is, *par excellence*, the Artist's organ and is most satisfying to every demand, whether judged from the musical or architectural standpoint.

It is confidently placed before a large constituency who are seeking the highest merit rather than overwrought decoration.

An organist's bench, designed along the lines of the style of this case, is furnished with each organ.

**John P. Marshall, Professor of History and Theory of Music, Boston University, Director of Music in Middlesex School.**

"For the part of two years I have used an Estey Organ, Style Z 56, in my class room at Boston University, and have found it the most satisfactory one manual organ I have ever used. The two manual Estey reed organ in use in the chapel of the Middlesex School takes the place of a small pipe organ as regards both quality and quantity of tone."

Height, 3 feet 11 inches. Length, 4 feet 5 inches. Depth, 2 feet 2 inches. Weight (boxed), 420 pounds.

Vox Humana

Mr. R. R. Russell, Chairman Organ Committee, Baptist Church, Carlisle, Ky.

"The organ you shipped us, Style O 94, arrived in good condition, and not even a scratch to mar its beauty could be found upon it. We are more than pleased, and cannot find words to express our appreciation. It is an instrument of beauty, and contains tone and volume that we think cannot be surpassed."

Harp Æolienne	2 ft.	Wald Flute	2 ft.		

Into these organs are introduced the *special scale* Philharmonic Reeds. These Reeds are not made like the ordinary organ reeds, but have wide tongues or vibrators which are mounted upon extra wide and heavy brass plates; the Case also is much larger than the regular organs, to receive the special size reed board and bellows.

The general effect of this aggregation of heavy-toned reeds is phenomenal, and places these organs practically out of competition.

Furnished either with or without the Pipe Top.

Always specify whether Oak or Walnut Case is Wanted.

Finished to match church or hall furnishings when so ordered. Furnished either with or without Pipe Top.

**W. D. Armstrong, Organist and Vice President Music Teachers' National Association, Alton, Ill.**

"The Eskey Organ, Style V 57, you furnished us for the oratorio 'Elijah' gave satisfaction in every particular. The sustaining qualities were most effective in the recitatives, while the power of the bass was wonderful. Both Mrs. Rohland and myself were more than pleased."

This organ is designed for use in small churches, and is well adapted also to lodge rooms. As in Pipe Organs, the registers or sets of reeds run throughout the keyboard instead of dividing, as in the one-manual organs.

The design on the opposite page represents the Organ with Pipe Top. By covering the top the effect without it can be readily observed.

*John P. Hessian, Organist of St. Patrick's Church, Roxbury, Mass.*

"I recently had the pleasure of playing one of your two manual organs at the concert given in St. Matthew's Church, Dorchester. The great variety of stops, the delicate solo effects and wonderful power of the full organ delighted the hearers as well as myself."

For illustrations of casing see following pages

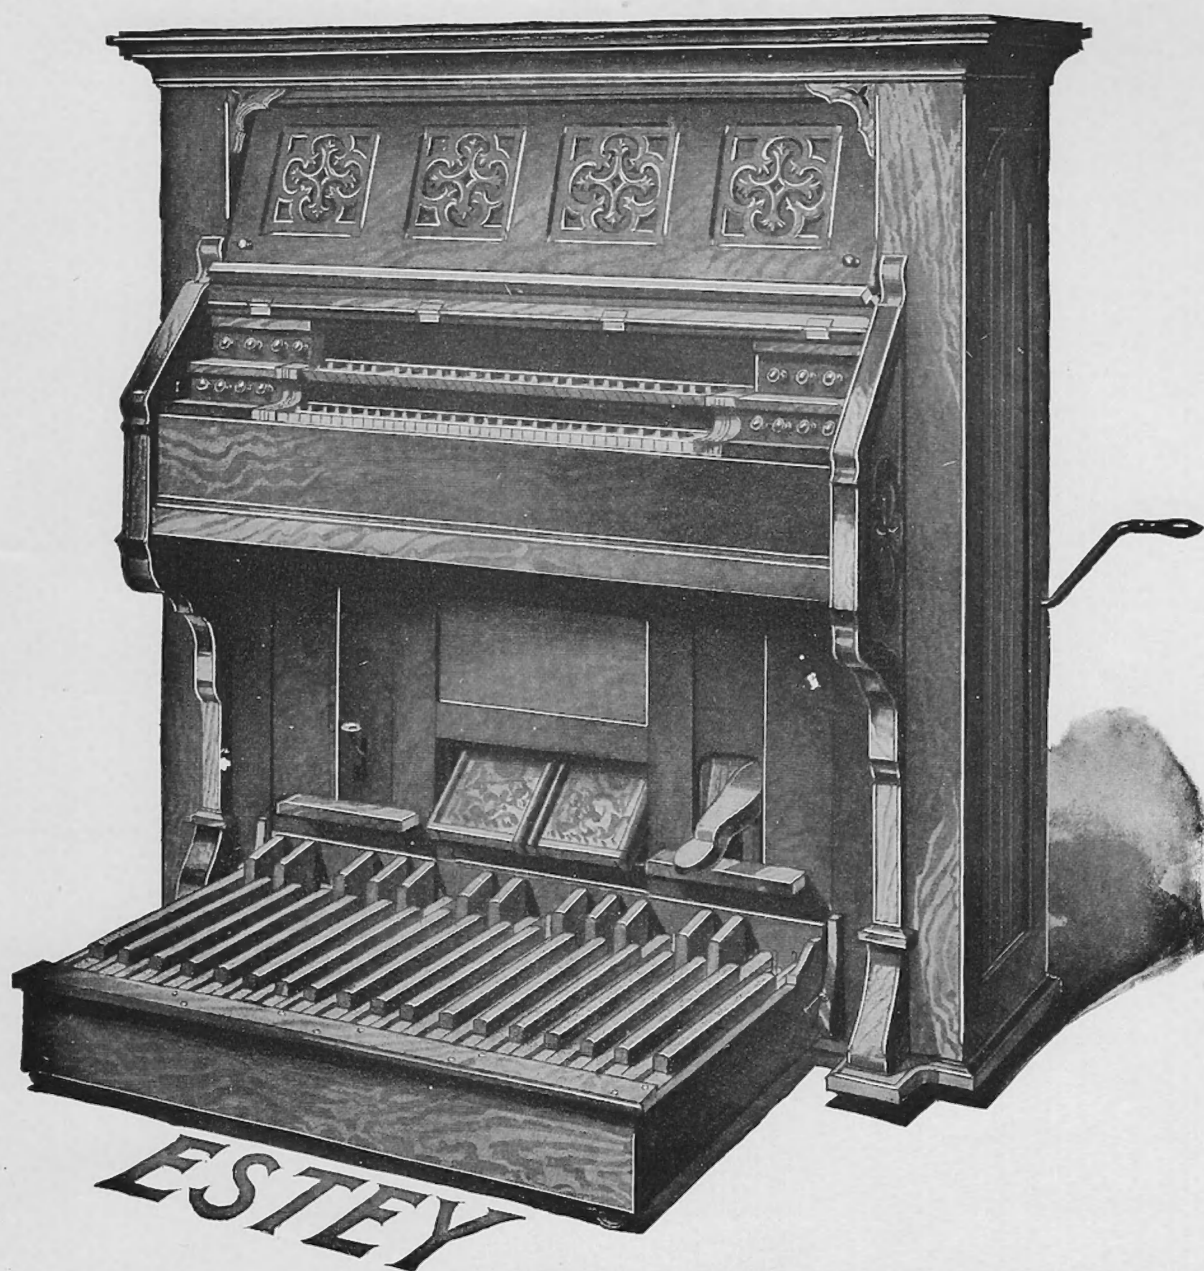

This organ is in touch with the latest developments in reed organ building and is appropriate for churches or other public places.

The registers are complete in themselves and not divided as in single manual organs.

The pedal registers are of the full two and one-half octave scale, the same as the modern Pipe Organ.

It is furnished with the large scale Philharmonic Reeds, which approximate in quality of tone the Pipe Organ.

Height, 5 feet 8 inches; with Pipe Top, 9 feet 8 inches. Depth, 2 feet 8 inches; with Pedals, 4 feet 2 inches. Length, 5 feet 9 inches; with Blow Lever, 6 feet 11 inches. Weight (boxed), 1125 pounds; Pipe Top adds 340 pounds.

Furnished in Black Walnut or Quartered Oak Casing

A very attractive Pipe Top can be furnished, when desired, at a moderate advance in cost.

*Rev. E. W. Cole, Hutchinson, Kan.*

"To say to you that the organ, Style G 61, we ordered from you some time ago, gives satisfaction only half expresses it. We are so proud of it. It is the sweetest toned instrument I ever heard, and a prominent musician said last evening that he considered it the equal of a twenty-five-hundred-dollar organ we have in one of the churches here in town. Yes, we surely are enthusiastic over our purchase."

## Style G 61.

CODE—Halcyon.  
Furnished with Blow Lever.  
For contents see page  
thirty.

Length, 6 feet 7 inches; with Blow Lever, 7 feet 9 inches. Height, 9 feet 10 inches. Depth, 3 feet; with Pedals in position, 4 feet 6 inches. Weight (boxed), 1800 pounds.

## A Brief Description of the Stops in use in Estey Organs

In speaking of a Stop as a Treble Stop or a Bass Stop, we mean a set of reeds situated in the upper or treble part of the organ, or in the lower or bass part. With this explanation the following enumeration of Stops will be readily understood. In Two Manual Organs the Stops run the entire length of the Keyboard.

NAME.	PITCH.	CHARACTERISTICS.	NAME.	PITCH.	CHARACTERISTICS.
<b>Bassett</b>	16 ft.	<i>Treble.</i> Rich pervading tone.	<b>Stopped Diapason</b>	16 ft.	<i>Pedal.</i> Soft accompanying stop. Used with Swell Organ or with solos.
<b>Bassoon</b>	8 ft.	<i>Bass.</i> Very powerful.	<b>Sub-Bass</b>	16 ft.	<i>Bass.</i> Powerful and resonant.
<b>Bourdon</b>	16 ft.	<i>Bass and Treble.</i> Full and round.	<b>Trumpet</b>	8 ft.	<i>Treble.</i> Very strong, open tone.
<b>Choral</b>	8 ft.	<i>Treble.</i> Large tone, bright and forceful.	<b>Viola</b>	4 ft.	<i>Bass.</i> Same character as Flute stop, of which it is the continuation. Used much for accompaniment.
<b>Clarinet</b>	16 ft.	<i>Treble.</i> Resembles the Clarinet in quality.	<b>Violetta</b>	4 ft.	<i>Bass.</i> Very soft and smooth tone; for accompaniment and echo effects.
<b>Cremona</b>	8 ft.	<i>Bass.</i> Soft and rich. Excellent for accompaniment.	<b>Vox Jubilante</b>	8 ft.	<i>Treble.</i> Its name will indicate its character; very effective as a solo, and when used in combination with other stops imparts a peculiar brilliancy to all.
<b>Diapason</b>	8 ft.	<i>Treble.</i> Foundation set of reeds by which all others are tuned. Round, full tone. Used more generally than any other stop, except Melodia.	<b>Wald Flute</b>	2 ft.	<i>Treble.</i> Very clear and penetrating. Used almost entirely with Full Organ.
<b>Dulciana</b>	8 ft.	<i>Treble.</i> Similar in quality to Diapason, but not as loud.	<b>Mechanical Stops.</b>		
<b>Dolce</b>	8 ft.	<i>Bass.</i> Similar to Melodia, but not as loud.			
<b>Flute</b>	4 ft.	<i>Treble.</i> Brilliant, but not reedy. Generally used in combination.	NAME.	CHARACTERISTICS.	
<b>Flute d'Amour</b>	4 ft.	<i>Treble.</i> A soft effect produced with Flute reeds.	<b>Balanced Swell</b>	Pedal Stop, so constructed as to open all the swells or shutters in Pedal Organs and will remain at any given point if desirable to release the foot.	
<b>Gamba</b>	8 ft.	<i>Bass.</i> Smooth and pipe-like in tone.	<b>Forte</b>	Opens swells, and augments the tone.	
<b>Harp Æolienne</b>	2 ft.	<i>Bass.</i> Closely resembles the tones produced by the vibrations of the strings of an Æolian Harp. Very fine for accompaniment.	<b>Grand Organ (Knee)</b>	Brings into use all the reeds in the organ without the necessity of drawing a stop.	
<b>Hautboy or Oboe</b>	8 ft.	<i>Treble.</i> Reedy in character, and very effective as a solo stop.	<b>Octave Coupler</b>	So constructed that when any key is depressed its octave above is also depressed thereby causing both to sound simultaneously.	
<b>Melodia</b>	8 ft.	<i>Bass.</i> Same quality as the Diapason, of which it is the continuation.	<b>Knee Swell</b>	Gives same effect as Forte, only more gradual if desired.	
<b>Octave</b>	4 ft.	<i>Treble.</i> Bright and leading.	<b>Swell to Great</b>	Used in organs with two manuals, and so connecting them that when a key on the lower manual is depressed it also depresses the corresponding key of the upper manual.	
<b>Open Diapason</b>	16 ft.	<i>Pedal.</i> Strong, fundamental tone, used with Great Organ and with full combination.	<b>Swell to Pedals</b>	Used in organs having Pedal Keys, and so connecting the manuals that when the pedal is depressed its corresponding key in the manual is depressed and responds also.	
<b>Pedal Bass</b>	16 ft.	<i>Pedal.</i> Deep, round and full.	<b>Great to Pedals</b>		
<b>Regal</b>	8 ft.	<i>Treble.</i> Strong solo stop. Also desirable in combination.	<b>Vox Humana</b>	A revolving fan, placed just back of the reeds, which, when set in motion, imparts to the tone a thrilling wave-like effect. It changes the reed tone completely, giving it the sympathetic sweetness of the human voice.	
<b>Saxophone</b>	8 ft.	<i>Treble.</i> Reedy tone, with good carrying power.
